
"WATER"

How Much Is Enough?

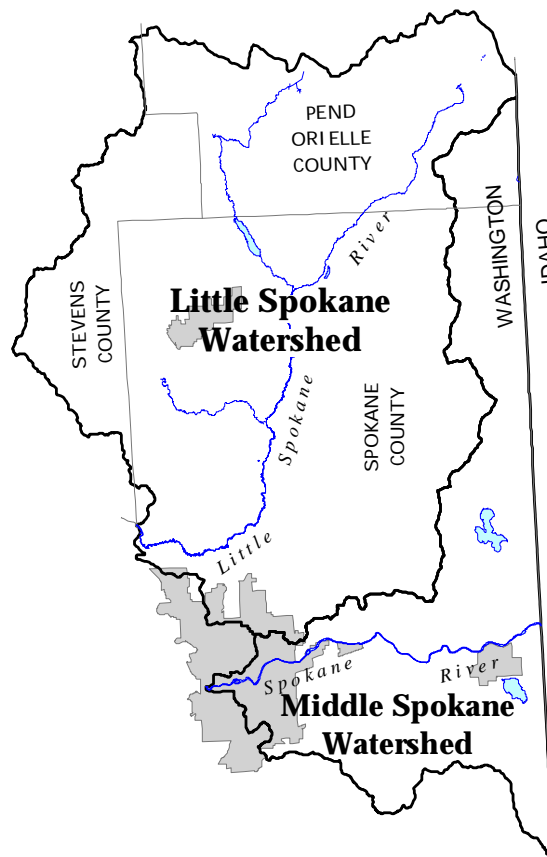

Our rivers and underground aquifers are intimately connected, and some experts question if there is enough water to support our region's continued growth.

In 1999, a planning unit made up of local agencies and various interest groups was formed to plan for future water use in the Middle Spokane and Little Spokane River watersheds. Since the project began, the planning unit and consulting scientists have compiled data relating to water use and water availability, and completed a Data Assessment Report.

The planning unit wants to share information with you on the work done to date, get comments on the data collected and current water use conclusions, and provide an overview of the next phase of the Watershed Planning project.

Your comments are important and will be considered as the project moves into the implementation phase. The planning unit looks forward to seeing you at one of these public meetings, sharing information, and hearing your insights, comments, and concerns.

Public Meetings

Wednesday

November 14, 2001

7:00 to 9:00 p.m.

West Valley High School

Multi-Purpose Room

8301 E. Buckeye

Thursday

November 15, 2001

7:00 to 9:00 p.m.

Riverside High School

Second Floor Library

4120 E. Deer Park - Milan Rd.

Be sure to attend one of these public meetings to:

- ⇒ Learn what Watershed Planning is all about.
- ⇒ Learn about our region's aquifer and current water use.
- ⇒ Learn about the planned instream flow, water quality, and aquifer storage evaluations.
- ⇒ Provide comments on where we've been and where we need to go.

YOUR INPUT ON WATERSHED PLANNING IS IMPORTANT!!!

~ Help develop recommendations that contribute to the long-term availability of water in our region ~

Visit the project web site at <http://spokanewatershed.golder.com>.

Call Spokane County's Water Quality Program at 477-6024 to be added to the mailing list.
