

Dear Resident,

Attached are the sign specifications for the "Children In Area" sign. The dimensions are for the maximum size sign that conforms to the Spokane County Zoning Code, or you may desire to utilize a smaller version of this sign. The signs are not allowed on the public road right of way which is typically 25 to 30 feet in width measured each side of the center of the road. You can contact the Spokane County Engineering Division for assistance in determining the width of the road right of way for your particular location. If you have any additional questions about this new signing option, you can call the Traffic Section of Spokane County at 477-3600.

Very truly yours,

Barry Greene, P.E.  
Traffic Engineer

# CHILDREN IN AREA IDENTIFICATION SIGN

1. Sign should be constructed of a durable material.
2. Sign face shall be made of blue background with white lettering.
3. Sign construction and installation shall conform to all pertinent regulations as outlined by the zoning code of Spokane County.
