

*LEPC Logo*

*Salutation --*

Because your firm is a business that files a Tier II report, we would like to introduce you to the Local Emergency Planning Committee (aka LEPC). The LEPC is a county wide group that is federally mandated to oversee the Tier II reports, make sure an emergency HAZ-MAT plan is in place, and plan/participate in a HAZ-MAT exercise each year.

Any business or agency that deals with hazardous materials may be interested in participating in the LEPC because it presents---

- a - an opportunity for networking and having discussions with other similarly minded folks
- b - a chance to learn about emergency responses and resources in Spokane County
- c - a place to learn about exercises that demonstrate how to be prepared before real problems occur

Our LEPC committee would like to extend an invitation to you, or a representative, to attend our meetings. We meet on the third Wednesday of the month at 9AM. To find our meeting locations (they sometimes vary), to see our agendas, or for more information, go to our website at (?)

*Signed by Chair*
