Transportation Needs + Priorities

Scenario 1: "Light Touch"

General Characteristics: Traffic volumes are low, and congestion is minimal. Existing infrastructure is adequate.

Transportation Features:
- Low-traffic roadways
- Minimal public transportation
- Sparse pedestrian and cycling infrastructure

Improvement Approach: Minor upgrades to existing infrastructure, focusing on safety improvements and minor accessibility enhancements.

Year: 2025

Scenario 2: "High Touch"

General Characteristics: Traffic volumes are high, and congestion is frequent. Existing infrastructure is outdated and insufficient.

Transportation Features:
- High-traffic roadways
- Extensive public transportation network
- Wide pedestrian and cycling infrastructure

Improvement Approach: Major upgrades to existing infrastructure, including new roadways, public transportation, and improved pedestrian and cycling facilities.

Year: 2030

Preferred Scenario:

- Let's choose Scenario 2: "High Touch" as it addresses the current traffic issues and provides better infrastructure for the future.

Below, let us know which type of transportation-related features you think the County ought to prioritize. Just everything down, and using the red dots, indicate your top five priorities.
