MEAD-MT.SPOKANE TRANSPORTATION AREA PLAN

Follow the project online at www.mead-mtspokane-plan.com

WHAT IS THIS PROJECT?

Spokane County and WSDOT are leading development of a long-range transportation plan for the Mead-Mt. Spokane Area. Working with residents, business owners and more, the Mead-Mt. Spokane Transportation Area Plan will establish a foundation for County initiatives and investment in the transportation system. The Plan will include community visioning and polling, land use market analysis, traffic forecasts and analysis, crash analysis, and multimodal transportation network assessment. Outcomes may include recommendations related to traffic safety, street design, street connectivity, bike and pedestrian facilities, and policy strategies.

WHY NOW?

The area around US-2 within the study area is poised for increased development and traffic growth in the near future. Several factors will contribute to this growth, including new sewer lines, completion of the North Spokane Corridor, regional population and employment growth, an increase in recreation trips, and pent-up demand for development. In addition, travel behaviors and demand are shifting. In light of this coming change, Spokane County and WSDOT are looking to get ahead of the game, by planning for future transportation investments to help shape and support future desired growth patterns and community priorities.

HOW CAN I CONTRIBUTE?

- We are seeking involvement from the public and stakeholders in shaping the vision and priorities for the area
- Complete the project minipoll: www.mead-mtspokane-plan.com
- Participate at public workshops:
  - Visioning and Scenario Evaluation Workshop: March 21st, 6 PM – 8 PM, Mountainside Middle School
  - Draft Plan Refinement Workshop: Late April or early May (date TBD)
- Stay involved online via the project website: www.mead-mtspokane-plan.com

TIMELINE

The project has a fairly tight timeline and will wrap up by early June:

- **FEB**: Project begins, community polling, data collection
- **MAR**: Research interviews, public workshop, data analysis, draft strategies
- **APR**: Public workshop, strategy refinement
- **MAY**: Draft Plan rollout and review
- **JUN**: Final Plan
