ECP-MAINTENANCE NOTES

1. The contractor shall be responsible for installation and maintenance of the temporary E.C.G. measures.
2. Segment barriers shall be inspected immediately after each rain-producing rainfall and at least daily during periods thereof.
3. Necessary repairs to barriers or replacement of filter fabric shall be accomplished promptly.
4. Segment grout bars shall be removed after each rain-producing rainfall. Grout bars must be removed when the level of infiltration exceeds approximately 1/2 the height of the barrier.
5. Any segment grout barriers remaining in place after the E.C.G. structure is no longer required shall be covered to the existing grade, prepared and seeded.
6. All temporary and permanent E.C.G. practices shall be maintained and repaired as needed to assure continued performance of their intended function.
7. All temporary E.C.G. measure shall be removed after two years. Removal shall be scheduled in advance or if after the temporary E.C.G. measure is no longer needed. Temporary E.C.G. shall be removed or stabilized on site. Destroyed soil, gravel and filter materials shall be properly re-scafed and removed.
8. The contractor shall be responsible for removing dirt, mud and other construction debris which may accumulate on paved streets adjacent to the site as a result of construction activity. Cleaning shall be done by the contractor using shoveling and water to wash the construction debris from the streets.
9. On-site busy control shall be accompanied by using water. Applications of water may be required several times for dust control activity.

Certification statement: I certify that the person or persons who signed this document meets the E.C.G. requirements as used in chapter 4.9 of the geotechnical standard guidelines for stormwater management.
