TEMPORARY EROSION CONTROL PLAN
FOR
FOREST HILLS FIFTH ADDITION
PORTION OF THE NE1/4 OF SECTION 13, T26N, R42E, W.M.
SPOKANE COUNTY, WASHINGTON

PROJECT SUMMARY
This project consists of the construction of 1,150 linear feet of 5-foot-wide private road to service 16 proposed single-family residential lots. The rendering of this project includes temporary erosion control measures that will be installed at all the construction sites to control stormwater runoff and sedimentation. These measures include vegetative cell and/or sedimentation basins, silt fences, and temporary erosion control measures. The project will also include the installation of temporary electrical systems to provide power for the construction activities. The temporary electrical systems will be designed and installed in accordance with the applicable electrical codes and regulations. The project will also include the installation of temporary water systems to provide potable water for the construction activities. The temporary water systems will be designed and installed in accordance with the applicable water codes and regulations. The project will also include the installation of temporary waste disposal systems to provide safe and sanitary disposal of waste materials generated during the construction activities. The temporary waste disposal systems will be designed and installed in accordance with the applicable waste disposal codes and regulations.
