CONSTRUCTION SPECIFICATIONS

1. All work shall be performed in accordance with the "A" Standard Specifications for Roads, Bridges, and Structural Engineering as published by the American Public Works Association, 1980 edition, and any amendments.

2. The Contractor shall be responsible for locating all underground utilities. Any conflicting utility shall be relocated prior to construction of vaults and drainage facilities.

3. The Contractor is required to have a complete set of the approved plans and drainage plans on the job site whenever the construction is in progress.

4. For construction of sewers, storm drain pipes (ductile iron or approved equivalent) between the storm sewer and the manhole interior, and between the manhole interior and the street curb, the Contractor shall be responsible for the quality of work, and the draining of the work area.

5. If the Contractor discovers any discrepancies between the plans and existing conditions, shall be brought to the attention of the Design Engineer and the Midland County Engineer's Office.

6. Prior to the construction of the detention pond, the Contractor is responsible for locating underground utilities. Call the underground utility location service at 432-5000 before work begins.
