EROSION & SEDIMENT CONTROL

1. Erosion and sediment control plans in the form of site plans, storm water drainage plans, and site grading plans shall be submitted to the Snohomish County Environmental Health Department for approval. The plans shall be designed to ensure that the site drainage system will be adequate to prevent erosion and sedimentation.

2. Site plans shall be submitted in accordance with the requirements of the Snohomish County Storm Drainage Manual. The plans shall include a detailed drainage system layout and a storm water management plan. The plans shall be designed to prevent erosion and sedimentation of the site.

3. Site plans shall be submitted in accordance with the requirements of the Snohomish County Storm Drainage Manual. The plans shall include a detailed drainage system layout and a storm water management plan. The plans shall be designed to prevent erosion and sedimentation of the site.

4. Site plans shall be submitted in accordance with the requirements of the Snohomish County Storm Drainage Manual. The plans shall include a detailed drainage system layout and a storm water management plan. The plans shall be designed to prevent erosion and sedimentation of the site.

5. Site plans shall be submitted in accordance with the requirements of the Snohomish County Storm Drainage Manual. The plans shall include a detailed drainage system layout and a storm water management plan. The plans shall be designed to prevent erosion and sedimentation of the site.

6. Site plans shall be submitted in accordance with the requirements of the Snohomish County Storm Drainage Manual. The plans shall include a detailed drainage system layout and a storm water management plan. The plans shall be designed to prevent erosion and sedimentation of the site.

7. Site plans shall be submitted in accordance with the requirements of the Snohomish County Storm Drainage Manual. The plans shall include a detailed drainage system layout and a storm water management plan. The plans shall be designed to prevent erosion and sedimentation of the site.

8. Site plans shall be submitted in accordance with the requirements of the Snohomish County Storm Drainage Manual. The plans shall include a detailed drainage system layout and a storm water management plan. The plans shall be designed to prevent erosion and sedimentation of the site.

9. Site plans shall be submitted in accordance with the requirements of the Snohomish County Storm Drainage Manual. The plans shall include a detailed drainage system layout and a storm water management plan. The plans shall be designed to prevent erosion and sedimentation of the site.

MAINTENANCE

1. The contractor shall be responsible for installation and maintenance of all temporary ESD measures.

2. Temporary erosion control measures shall be installed prior to the issuance of a building permit and shall be removed prior to the issuance of a certificate of occupancy.

3. Temporary erosion control measures shall be installed prior to the issuance of a building permit and shall be removed prior to the issuance of a certificate of occupancy.

4. Temporary erosion control measures shall be installed prior to the issuance of a building permit and shall be removed prior to the issuance of a certificate of occupancy.

5. Temporary erosion control measures shall be installed prior to the issuance of a building permit and shall be removed prior to the issuance of a certificate of occupancy.

6. Temporary erosion control measures shall be installed prior to the issuance of a building permit and shall be removed prior to the issuance of a certificate of occupancy.

7. Temporary erosion control measures shall be installed prior to the issuance of a building permit and shall be removed prior to the issuance of a certificate of occupancy.

8. Temporary erosion control measures shall be installed prior to the issuance of a building permit and shall be removed prior to the issuance of a certificate of occupancy.

9. Temporary erosion control measures shall be installed prior to the issuance of a building permit and shall be removed prior to the issuance of a certificate of occupancy.

DRIED GRASS SEED MIX

For a temporary grass seed mix suitable for erosion control, the following seed mix is recommended:

- Ryegrass: 20% by weight
- Bluegrass: 20% by weight
- Fescue: 20% by weight
- Other grasses: 40% by weight

The seed mix shall be broadcasted over the project area as per the site plans. The seed mix shall be thoroughly mixed with the topsoil prior to planting to ensure proper coverage and penetration.

SILV RIVER ESTATE, P.O. BOX 114, COWICHAN BAY, B.C.

DATE: 12/2/93

**Note:** The plans may be subject to change and should be reviewed by a professional engineer or architect before construction begins.
