Sediment Trap Details

SEDIMENT CONTROL NOTES

1. The required permits must meet the basic requirements of Spokane County and the appropriate local municipality. The construction shall not begin until the required permits are in hand and have been approved. The contractor shall be responsible for obtaining all necessary permits and for following the permit conditions. Any failure to obtain the required permits or to follow the permit conditions shall result in the contractor being held responsible for all costs and damages.

2. The specific construction and maintenance schedule for the temporary sediment trap installed in temporary pipe shall be as follows:
   A. The construction shall be installed at the time of drain pipe installation, and must be in place immediately after the drain pipe is backfilled.
   B. The trench is to be excavated to the required depth after the drain pipe is backfilled.
   C. The trench is to be backfilled with soil after the drain pipe is backfilled.
   D. The trench is to be sloped so that the slope is not more than 1:2 (vertical to horizontal).

3. The contractor shall provide all necessary materials for the construction of the sediment trap, including the pipe, sediment control mats, and any other necessary materials.

4. All work shall be performed in accordance with the specifications and the approved plans and specifications.

5. All work shall be performed in accordance with the approved plans and specifications.

6. All work shall be performed in accordance with the approved plans and specifications.

7. All work shall be performed in accordance with the approved plans and specifications.

8. All work shall be performed in accordance with the approved plans and specifications.
