

Fee Schedule

BP-4

Department of Building and Planning

The Building and Planning Department is responsible for construction and land use permit application/issuance and enforcement of various construction and site development regulations related to the use and occupancy of buildings. Fees collected are placed in a dedicated fund, where the department operates within the revenues it receives. Following is the latest fee schedule for most construction and land use related permits. Please consult with office staff to verify specific fees for your project. This fee schedule has been separated into two parts:

Part 1: Construction and Related Permit Fees

Part 2: Land Use and Development Fees

PART 1 CONSTRUCTION AND RELATED PERMIT FEES

Effective January 1, 2011, construction permits are no longer based on the valuation of a project, but on the actual average cost to the Building Department for processing permits, reviewing plans, and inspecting work under a permit. Note that other program and agency fees, including but not limited to the Land Use Program, Engineering and Roads Department, Health District, Fire District, and environmental fees may apply.

All processing, land use review, and plan review fees are due at the time of application and plan submittal for all commercial projects, and for residential projects such as, but not limited to: new single family residence, substantial additions or alterations, grading, relocation, retaining walls, and shell-only. The inspection fees and any other agency fees are due and will be collected once the permit is ready to be issued. For the remaining projects, all fees are due and payable at the time the permit is ready to be issued. **Please note that application processing fees are nonrefundable.**

Any "drop-off" applications and plans shall be accompanied by the appropriate fee payment as stated above. Again, please consult with office staff to verify specific fees for your project.

Work does not change the use or occupancy group of the space/building; does not involve structural components; reconfiguring the required exiting (unless adding an exit for

compliance purposes) or fire-safety features. Examples of work contemplated under the Minor Alteration permit: Removal of architectural barriers for improved accessibility; widening/installation of an exit door to improve exit flow/capacity; removal or reconfiguration of non-bearing partitions; typically do not require circulation/review of multiple agencies.

Example:

Joe Smith wants to build a storage facility that includes an office space. The permit fee is calculated as follows:

Separate the occupancy groups by type,
calculating the square feet:
25 x 15 Office = 375 sq. ft. Group B Occupancy
50 x 40 Storage Area = 2,000 sq. ft. Group S
Occupancy

For the inspection fee, multiply the square feet using the chart above:

375 x .27 = \$101.25 Group B
2,000 x .19 = \$380.00 Group S

Since the minimum fee is greater, the inspection fee would be:

\$1,485.05 Group B Inspection Fee
\$ 687.71 Group S Inspection Fee
\$2,172.76 Total Inspection Fee

For the plan review, multiply the square feet using the chart above:

375 x .09 = \$33.75 Group B

2,000 x .12 = \$240.00 Group S

Since the minimum fee is greater, the plan review fee would be:

\$1,318.70 Group B Plan Review Fee

\$ 586.09 Group S Plan Review Fee

\$1,904.79 Total Plan Review Fee

The total fee to be paid is:

\$ 539.73 Processing Fee (paid at time of application & plan submittal)

\$1,904.79 Plan Review Fee (paid at time of application & plan submittal)

\$2,444.52 Total to be paid at application & plan submittal
