

ENVIRONMENTAL CHECKLIST

SPOKANE ENVIRONMENTAL ORDINANCE SECTION 11.10.230[1]

Updated November 19, 2002

Environmental Checklist

SPOKANE ENVIRONMENTAL ORDINANCE

(WAC 197-11-985) Section 11.10.230(5)
Notice of Assumption

File No. HMP Update

File No. HMP Update

Purpose of Checklist:

The State Environmental Policy Act (SEPA) chapter 43.21C RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An Environmental Impact Statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the agency identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency decide whether an EIS is required.

Instructions for Applicants:

This environmental checklist asks you to describe some basic information about your proposal. Governmental agencies use this checklist to determine whether the environmental impacts of your proposal are significant, requiring preparation of an EIS. Answer the questions briefly, with the most precise information known, or give the best description you can.

You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer, or if a question does not apply to your proposal, write "do not know" or "does not apply." Complete answers to the questions now may avoid unnecessary delays later.

Some questions ask about governmental regulations, such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the governmental agencies can assist you.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Use of checklist for nonproject proposals:

Complete this checklist for nonproject proposals, even though questions may be answered "*does not apply.*"

IN ADDITION, complete the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (Part D).

For nonproject actions, the references in the checklist to the words "project," "applicant," and "property or site" should be read as "proposal," "proposer," and "affected geographic area," respectively.

A. BACKGROUND

1. Name of proposed project, if applicable:

Hazard Mitigation Plan Update- Volume 1 Planning-Area-Wide Elements and Volume 2 Planning Partner Annexes

2. Name of applicant: **Spokane County**

SPOKANE ENVIRONMENTAL ORDINANCE

(WAC 197-11-985) Section 11.10.230(5)
Notice of Assumption

File No. HMP Update

A. BACKGROUND CONT'D

3. Address and phone number of applicant or contact person:

Ethan Rogers
Spokane County Division of Engineering and Roads
1026 W. Broadway Avenue
Spokane WA 99260-0170

4. Date checklist prepared:

September 24, 2014

5. Agency requesting checklist:

Spokane County

6. Proposed timing or schedule (including phasing, if applicable):

A resolution adopting the Hazard Mitigation Plan will be approved by Spokane County in 2014.

7. a. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Yes, an update to the Hazard Mitigation Plan will be completed at a time not yet determined. Recommended initiative projects meeting the goals of this plan are outlined in Volume 2.

- b. Do you own or have options on land nearby or adjacent to this proposal? If yes, explain.

Yes, this Hazard Mitigation Plan will cover areas that are within/adjacent to Spokane County property, and any other properties owned by a specific jurisdiction within the Spokane County area.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to his proposal.

Existing environmental documents and information can be found with Spokane County Public Works Department, Division of Engineering and Roads. Individual environmental documentation will be prepared for individual initiatives or projects as required and if not categorically exempt. This document will not address these impacts in any detail.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

None known

SPOKANE ENVIRONMENTAL ORDINANCE

(WAC 197-11-985) Section 11.10.230(5)

File No. HMP Update

Notice of Assumption

A. BACKGROUND CONT'D

10. List any government approvals or permits that will be needed for your proposal, if known.
Spokane County Board of County Commissioners Resolution and approval of other participating local jurisdictions
Interagency Agreements where applicable
No permits for this Plan but permits may be required for individual initiatives and will be addressed by the applicable jurisdiction prior to implementation.

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page.
The Spokane County Hazard Mitigation Plan (Plan) was created to better facilitate resources for meeting the federal Disaster Mitigation Act of 2000 for as many eligible local jurisdictions in Spokane County as is possible. Hazard mitigation is the use of long- and short-term strategies to reduce or alleviate the loss of life, personal injury, and property damage that can result from a disaster. It involves strategies such as planning, policy changes, programs, projects and other activities that can mitigate the impacts of hazards. Unincorporated Spokane County and a number of local jurisdictions and special districts have participated in this plan and have provided mitigation projects that are to be completed to meet the plans goals. The goals of the Plan are as follows:
 1. *Ensure effective and efficient emergency response and recovery capabilities to reduce the loss of life and property during and after a disaster through mitigation.*
 2. *Protect property including critical public facilities and infrastructure from possible damage due to hazards.*
 3. *Protect the continuity of local government to ensure no significant disruption of services during or due to a natural disaster.*
 4. *Build and support local capacity to enable the whole community to prepare, respond, mitigate and recover from the impact of natural hazards.*
 5. *Encourage the development and implementation of sustainable, cost-effective and environmentally sound mitigation projects.*
 6. *Improve communication and information sharing within the community to support the planning for, response to, mitigation of and recovering from, the impacts of disasters.*

12. Location of the proposal. Give sufficient information to a person to understand the precise location of your proposed project, including a street address, if any, and section, township and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit application related to this checklist.

This Plan covers the unincorporated areas of Spokane County, Washington along with the City's of Airway Heights, Cheney, Deer Park, Liberty Lake, Millwood, Spokane, and Spokane Valley within Spokane County. It also includes two special purpose districts, the Newman Lake Flood Control Zone District and the Spokane Valley Fire Department. The proposal includes initiatives for a number of different future projects within the Spokane County, Washington area.

SPOKANE ENVIRONMENTAL ORDINANCE

(WAC 197-11-985) Section 11.10.230(5)

File No. HMP Update

Notice of Assumption

A. BACKGROUND CONT'D

13. Does the proposed action lie within the Aquifer Sensitive Area (ASA)? The General Sewer Service Area? The City of Spokane? (See: Spokane County's ASA Overlay Zone Atlas for boundaries.)

Yes. The Plan includes these areas, also there are a number of projects in the Hazard Mitigation Plan that may be located in any number of the listed areas above.

14. The following questions supplement Part A.

a. Critical Aquifer Recharge Area (CARA) / Aquifer Sensitive Area (ASA)

- (1) Describe any systems, other than those designed for the disposal of sanitary waste, installed for the purpose of discharging fluids below the ground surface (includes systems such as those for the disposal of stormwater or drainage from floor drains). Describe the type of system, the amount of material to be disposed of through the system and the types of material likely to be disposed of (including materials which may enter the system inadvertently through spills or as a result of firefighting activities).

Non-project, does not apply to Plan. Any systems in future proposed initiatives will be addressed during planning for the specific project.

- (2) Will any chemicals (especially organic solvents or petroleum fuels) be stored in above ground or underground storage tanks? If so, what types and quantities of material will be stored?

Generally, petroleum fuel will be stored above ground during construction; however storage of other additional chemicals may be stored, and will need to be determined on a project by project basis within the Hazard Mitigation Plan.

- (3) What protective measures will be taken to insure that leaks or spills of any chemicals stored or used on site will not be allowed to percolate to groundwater. This includes measures to keep chemicals out of disposal systems.

Project specifications will follow local guidelines to insure that protective measures are taken

- (4) Will any chemicals be stored, handled or used on the site in a location where a spill or leak will drain to surface or groundwater or to a stormwater disposal system discharging to surface or groundwater?

Project specifications will follow local guidelines to insure that protective measures are taken

SPOKANE ENVIRONMENTAL ORDINANCE

(WAC 197-11-985) Section 11.10.230(5)
Notice of Assumption

File No. HMP Update

A. BACKGROUND CONT'D

b. Stormwater

- (1) What are the depths on the site to groundwater and to bedrock (if known)?

Depths to groundwater and bedrock will vary on a project by project basis within the Hazard Mitigation Plan.

- (2) Will stormwater be discharged into the ground? If so, describe any potential impacts?

Non-project, does not apply

TO BE COMPLETED BY APPLICANT

B. ENVIRONMENTAL ELEMENTS

For Agency
Use Only

1. Earth

- a. General description of the site (circle one): *flat, rolling, hilly, steep slopes, mountains, other:*

The geographic area includes all of the listed types of terrain

- b. What is the steepest slope on the site (approximate percent slope)?
Non-project, does not apply

- c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any prime farmland.

There is a wide variety of soil types that can be found within Spokane County, and must be taken into account on a project by project basis

- d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

There are a number of areas within Spokane County that have erodible soils that must be taken into account on a project by project basis

- e. Describe the purpose, type, and approximate quantities of any filling or grading proposed. Indicate source of fill:

Filling and grading will be handled on a project specific basis within the Hazard Mitigation Plan, and will be utilized in accordance with local standards.

SPOKANE ENVIRONMENTAL ORDINANCE

(WAC 197-11-985) Section 11.10.230(5)
Notice of Assumption

File No. HMP Update

B. ENVIRONMENTAL ELEMENTS CONT'D

For Agency
Use Only

- f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

Non project, does not apply

- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

Non project, does not apply

For Agency
Use Only

- h. Proposed measures to reduce or control erosion or other impacts to the earth, if any:

Project specifications will follow local guidelines to insure protective measures are taken

2. Air

- a. What type of emissions to the air would result from the proposal (i.e., dust, automobile, odors, industrial, wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known.

Non project, does not apply

- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

Non project, does not apply

- c. Proposed measures to reduce or control emissions or other impacts to air, if any:

Non project, does not apply

Notice of Assumption

File No. HMP Update

B. ENVIRONMENTAL ELEMENTS CONT'D

3. Water

a. SURFACE:

- (1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Projects under this Hazard Mitigation Plan may be within close proximity to the various water bodies located within the Spokane County area.

- (2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

Yes, projects may occur near, adjacent, or cross over one or more of the various water bodies

- (3) Estimate the amount of fill and dredge material that would be placed in or removed from the surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

Non project, does not apply

- (4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

Bridge and culvert maintenance projects may require the use of a temporary stream diversion during construction

- (5) Does the proposal lie within a 100-year floodplain? ____ If so, note location on the site plan.

Yes, there are areas within Spokane County that are considered within the 100 year floodplain of various water bodies.

- (6) Does the proposal involve any discharge of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

Non project, does not apply

For Agency
Use Only

SPOKANE ENVIRONMENTAL ORDINANCE

(WAC 197-11-985) Section 11.10.230(5)

File No. HMP Update

Notice of Assumption

B. ENVIRONMENTAL ELEMENTS CONT'D

b. GROUND:

- (1) Will groundwater be withdrawn, or will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

Non project, does not apply

- (2) Describe waste material that will be discharged into the ground from septic tanks or other sanitary waste treatment facility. Describe the general size of the system, the number of houses to be served (if applicable) or the number of persons the system(s) are expected to serve.

Non project, does not apply

c. WATER RUNOFF (INCLUDING STORMWATER):

- (1) Describe the source of runoff (including stormwater) and method of collection and disposal if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Runoff from projects within the Hazard Mitigation Plan will be collected and stored following local jurisdiction requirements

- (2) Could waste materials enter ground or surface waters? If so, generally describe.

Project specifications will follow local guidelines to insure protective measures are taken

- d. Proposed measures to reduce or control surface, ground, and runoff water impacts, if any.

Project specifications will follow local guidelines to insure protective measures are taken

SPOKANE ENVIRONMENTAL ORDINANCE

Notice of Assumption

File No. HMP Update

B. ENVIRONMENTAL ELEMENTS CONT'D

4. Plants

- a. Check or circle type of vegetation found on the site:
- _____ Deciduous tree: *alder, maple, aspen, other.*
 - _____ Evergreen tree: *fir, cedar, pine, other.*
 - _____ Shrubs
 - _____ Grass
 - _____ Pasture
 - _____ Crop or grain
 - _____ Wet soil plants, *cattail, buttercup, bullrush, skunk cabbage, other.*
 - _____ Water plants: *water lilly, eelgrass, milfoil, other.*
 - _____ Other types of vegetation.

Projects that fall within the Hazard Mitigation Plan could include one or more of the types of plants listed above

- b. What kind and amount of vegetation will be removed or altered?
- Non-project, does not apply*
- c. List threatened or endangered species known to be on or near the site.
- Non-project; lists of endangered species will vary from project to project, and therefore an inquiry will be requested for each project*
- d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:
- Non-project, does not apply*

For Agency
Use Only

B. ENVIRONMENTAL ELEMENTS CONT'D

5. Animals

- a. Circle any birds and animals which have been observed on or near the site or are known to be on or near the site:

birds: hawk, heron, eagle, songbirds, other: _____

mammals: deer, bear, elk, beaver, other: _____

fish: bass, salmon, trout, herring, shellfish, other: _____

other:

Projects that fall within the Hazard Mitigation Plan could include one or more of the types of animals listed above

- b. List any threatened or endangered species known to be on or near the site.

Non project; lists of endangered species will vary from project to project, and therefore an inquiry will be requested for each project

- c. Is the site part of a migration route? If so, explain.

This Hazard Mitigation Plan includes projects which could be in the path of an existing migration route, and an inquiry will be requested on a project-by-project basis

- d. Proposed measures to preserve or enhance wildlife, if any:

Non-project, does not apply

6. Energy and natural resources

- a. What kinds of energy (electric, natural gas, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Energy needs will be determined upon a project by project basis, dependent upon the hazard that is to be mitigated.

- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

Non-project, does not apply

- c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

Non project; energy conservation techniques will be utilized when reasonable on project-by-project basis.

B. ENVIRONMENTAL ELEMENTS CONT'D

7. Environmental health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste that could occur as a result of this proposal? If so, describe.

This proposal outlines plans to mitigate the effects of hazards that result from natural processes

- (1) Describe special emergency services that might be required.

This Hazard Mitigation Plan works to improve the efficiency of emergency services among the various planning partners

- (2) Proposed measures to reduce or control environmental health hazards, if any:

Non-project, does not apply. Any measures in future proposed initiatives will be addressed during planning for the specific project.

- b. NOISE:

- (1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

Non project, does not apply

- (2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Non-project, does not apply

- (3) Proposed measure to reduce or control noise impacts, if any:

Projects will comply with local noise ordinances

B. ENVIRONMENTAL ELEMENTS CONT'D

8. Land and shoreline use

- a. What is the current use of the site and adjacent properties?
There are a variety of uses for land within the area covered by the Hazard Mitigation Plan

- b. Has the site been used for agriculture? If so, describe.

Yes, there are areas within the Plan that are zoned and used as agricultural land.

- c. Describe any structures on the site.
Non-project, does not apply

- d. Will any structures be demolished? If so, which?

Non-project, does not apply

- e. What is the current zoning classification of the site?

Zoning classifications vary for each jurisdiction with Spokane County

- f. What is the current comprehensive plan designation of the site?

Comprehensive plans vary for each local jurisdiction within Spokane County

- g. If applicable, what is the current shoreline master program designation of the site?

Spokane County and other jurisdictions have current Shoreline Master Program for various sites along lakes and rivers.

- h. Has any part of the site been classified as a critical area? If so, specify.

Critical areas for projects within Spokane County and other applicable jurisdictions will be addressed on a project-by-project basis

- i. Approximately how many people would reside or work in the completed project?

Spokane County and the local jurisdictions within contain approximately 500,000 people.

- j. Approximately how many people would the completed project displace?

Non-project, does not apply

- k. Proposed measures to avoid or reduce displacement impacts, if any:

Non-project, does not apply

SPOKANE ENVIRONMENTAL ORDINANCE

B. ENVIRONMENTAL ELEMENTS CONT'D

1. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:
Projects within the Hazard Mitigation Plan will follow existing local regulations for land use plans

9. Housing

- a. Approximately how many units would be provided, if any? Indicate whether high-, middle- or low-income housing.
Non-project, does not apply
- b. Approximately how many units, if any, would be eliminated? Indicate whether high-, middle- or low-income housing.
Non-project, does not apply
- d. Proposed measures to reduce or control housing impacts, if any:
Non-project, does not apply

10. Aesthetics

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?
Tallest building heights and aesthetic themes vary by local jurisdiction, and thus will need to be determined on a project-by-project basis
- b. What views in the immediate vicinity would be altered or obstructed?
Non-project, does not apply
 - c. Proposed measures to reduce or control aesthetic impacts, if any:
Non-project, does not apply

11. Light and Glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?
Non-project, does not apply
- b. Could light or glare from the finished project be a safety hazard or interfere with views?
Non-project, does not apply

For Agency
Use Only

Notice of Assumption

File No. HMP Update

B. ENVIRONMENTAL ELEMENTS CONT'D

- c. What existing off-site sources of light or glare may affect your proposal?
Non-project, does not apply
- d. Proposed measures to reduce or control light and glare impacts, if any:
Non-project, does not apply

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity?
Within Spokane County, there are a number of Federal, State, and local parks and recreation areas.
- b. Would the proposed project displace any existing recreational uses? If so, describe.
Non-project, does not apply
- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:
Non-project, does not apply

13. Historic and cultural preservation

- a. Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe.
Affects to cultural and historical areas will be addressed on a project-by-project basis
- b. Generally describe any landmarks or evidence of historic archaeological, scientific or cultural importance known to be on or next to the site.
There are a number of historical and cultural areas within Spokane County, which will need to be taken into consideration on a project-by-project basis

File No. HMP Update

Notice of Assumption

B. ENVIRONMENTAL ELEMENTS CONT'D

For Agency
Use Only

- c. Proposed measures to reduce or control impacts, if any:
Measures to reduce/control impacts will be taken on a project by project basis in accordance with local regulations

14. Transportation

- a. Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any.
Public streets and highways will be identified on a project by project basis for projects within the Hazard Mitigation Plan
- b. Is site currently served by public transit? If not, what is the approximate distance to the nearest transit stop?
Spokane Transit Authority serves a large portion of Spokane County's population, in a number of different local jurisdictions
- c. How many parking spaces would the completed project have? How many would the project eliminate?
Non-project, does not apply
- d. Will the proposal require any new roads or streets, or improvements to existing roads or streets not including driveways? If so, generally describe (indicate whether public or private).
Non-project, does not apply
- e. Will the project use (or occur in the immediate vicinity of) water, rail or air transportation? If so, generally describe.
Non-project, does not apply
- f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak would occur. *(Note to assist in review and if known indicate vehicle trips during PM peak, AM peak and weekday (24 hours).)*

The plan will cover a number of different areas with varying traffic demands that will need to be taken into account on a project-by-project basis
- g. Proposed measures to reduce or control transportation impacts, if any:

Non-project, does not apply

For Agency
Use Only

Notice of Assumption

B. ENVIRONMENTAL ELEMENTS CONT'D

15. Public services

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe.

The plans set out by each planning partner are designed to mitigate the need of emergency public services by decreasing the effect and/or frequency of a hazardous event

- b. Proposed measures to reduce or control direct impacts on public services, if any:

The plans set out by each planning partner are designed to mitigate the need of emergency public services by decrease the effect and/or frequency of a hazardous event

16. Utilities

- a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other : (cable)
- b. Describe the utilities that are proposed for the project, the utility providing the service and the general construction activities on the site or in the immediate vicinity which might be needed.

Non-project, does not apply. Any utilities in future proposed initiatives will be addressed during planning for the specific project.

C. SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS

For Agency
Use Only

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment. When answering these questions, be aware of the extent the proposal or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

During construction projects for mitigation, vehicles using petroleum fuel may be used and discharge fumes and particulate matter into the air

Proposed measures to avoid or reduce such increases are:

Specific measures will be detailed on a project specific basis, and will comply with local guidance.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?
All projects will comply with the appropriate environmental permits required by federal, state, and local jurisdictions.

3. How would the proposal be likely to deplete energy or natural resources?
Projects that require construction will use petroleum fuels. The goals of some of the projects in the Hazard Mitigation Plan include the preservation and/or improvement of natural resources within the jurisdiction of the planning partners.

Proposed measures to protect or conserve energy and natural resources are:

Specific measures will be detailed on a project specific basis, and will comply with local guidance.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?
The Hazard Mitigation Plan is to be used to improve or mitigate the effects of projects that are to be done in environmentally sensitive designated areas.

Proposed measures to protect such resources or to avoid or reduce impacts are:

Specific measures will be detailed on a project specific basis, and will comply with local guidance.

Notice of Assumption

File No. HMP Update

C. SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS TO BE COMPLETED BY APPLICANT

For Agency
Use Only

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

No impact is expected during normal conditions. However this plan hopes to improve the capability of public services and utilities to meet demand during an emergency situation.

Proposed measures to reduce or respond to such demand(s) are:

Local jurisdictions have provided in this plan a number of different measures that are a response to this demand.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

No conflicts are expected. Instead, this proposal will help each planning partner improve compliance with various environmental protection laws.

FOR STAFF USE ONLY

Staff member(s) reviewing checklist: Marianne Barrentine

Based on this staff review of the environmental checklist and other pertinent information, the staff concludes that:

A. there are no probable significant adverse impacts and recommends a Determination of Nonsignificance.

B. probable significant adverse environmental impacts do exist for the current proposal and recommends a Mitigated Determination of Nonsignificance with conditions.

C. there are probable significant adverse environmental impacts and recommends a Determination of Significance.
